 Subject: RE: NPL Site Priority Characterization in PA

Kevin:

Attached are two files containing PADEP's edits for the NPL Priority Listing for Jackson Ceramix and Safety Light Corp. The Department requests the Safety Light classification be considered for a Tier A due to the immediate short term threat to human health and the environment at the site. Any questions please call or e-mail. Thanks.

 Subject: Site Priority Characterization form for Safety Light Corporation

To: Safety Light Corporation group (EPA)  
 Larry Newcomer, Edward Karmilovich, Robert Maiers, Craig Olewiler (PA DEP)

As noted in my e-mail of Oct. 31, EPA HQ is initiating a new process to prioritize those sites which the EPA regions wish to propose to the NPL. The first National Priority Panel meeting will be held in Washington, DC on Nov. 19-20. A total of 34 sites will be discussed, including four from R3.

In preparation for this meeting, we have been asked to complete a "Site Priority Characterization" form (previously referred to as a "Priority Template" form) for each site. I have completed a first draft of this form for Safety Light Corporation and have attached it here:

(See attached file: PriorityTemplate-SafetyLightCorp.wpd)

Please review this form and provide me with any input. For descriptions of the "tiers" (noted near the beginning of the form), please refer to the following document. This document also contains some of the
